Electronic Games Store

I love airplanes, and I often follow E-game stores like my peers. However, I have received fraudulent messages from untrustworthy websites. Therefore, I must be vigilant and adept at dealing with them to ensure my cybersecurity.

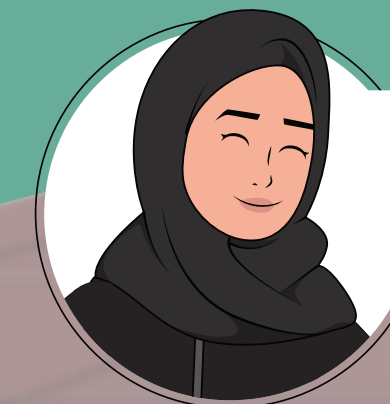

Jasim: A polite child in primary school, beloved, and has a sense of humor.

Rashid: A well-mannered child in primary school who spends most of his time with his friends.

Nasser: A smart and talented child in primary school, curious and fond of pets.

The teacher: A woman in her thirties, friendly with the students and keen on their well-being.

The classroom was noisy, filled with children playing and having fun before the teacher's arrival.

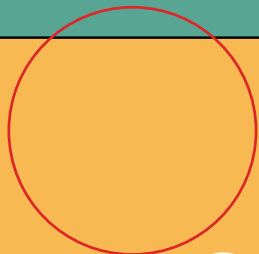

While Jasim was engrossed in the desktop computer, staring at its screen with interest, he called out to his friend Rashid **and said:**

- Look Rashid, this store sent me an email to buy this beautiful airplane. How did they know I love planes so much?!

Wait Jasim.. Don't click on that link.

Rashid shouted at him with concern,
and approached him to prevent him
from clicking on the link.

- Why?

Jasim asked in surprise.

- Because this could be dangerous.

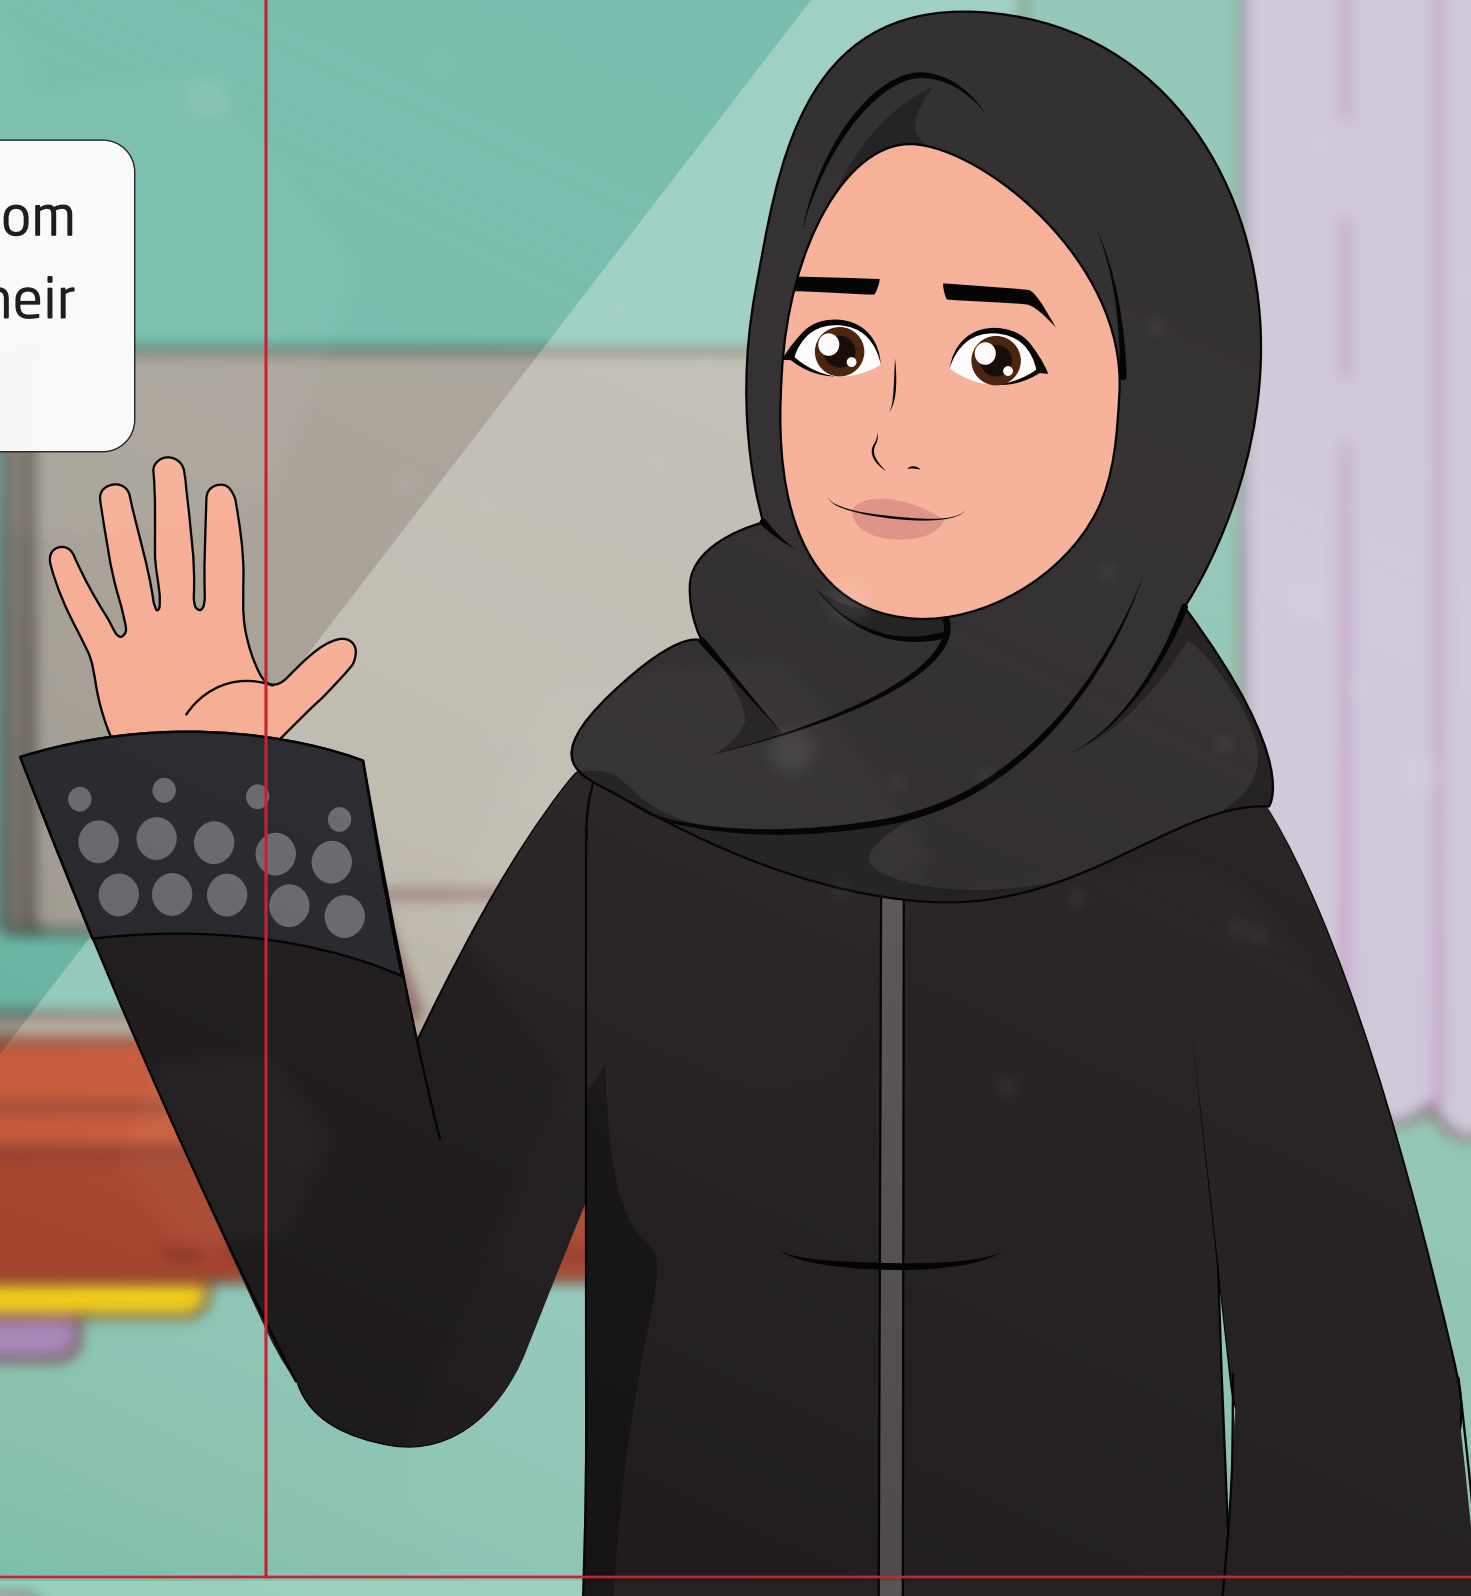

Jasim laughed with a loud voice and said:

- Dangerous! I don't see any reason to feel threatened. It's just a game in the shape of an airplane.

At that moment, the teacher entered the classroom quietly, the noise stopped, and the students took their seats.

The teacher greeted her students, and approached Jasim. She had overheard fragments of the conversation upon entering the room and asked,

- What's the problem, children?

Rashid said, pointing to the computer:

- Jasim wants to open a message from an unknown source, teacher...what do you think? Is this safe for him?

Jasim looked at him with surprise and said:

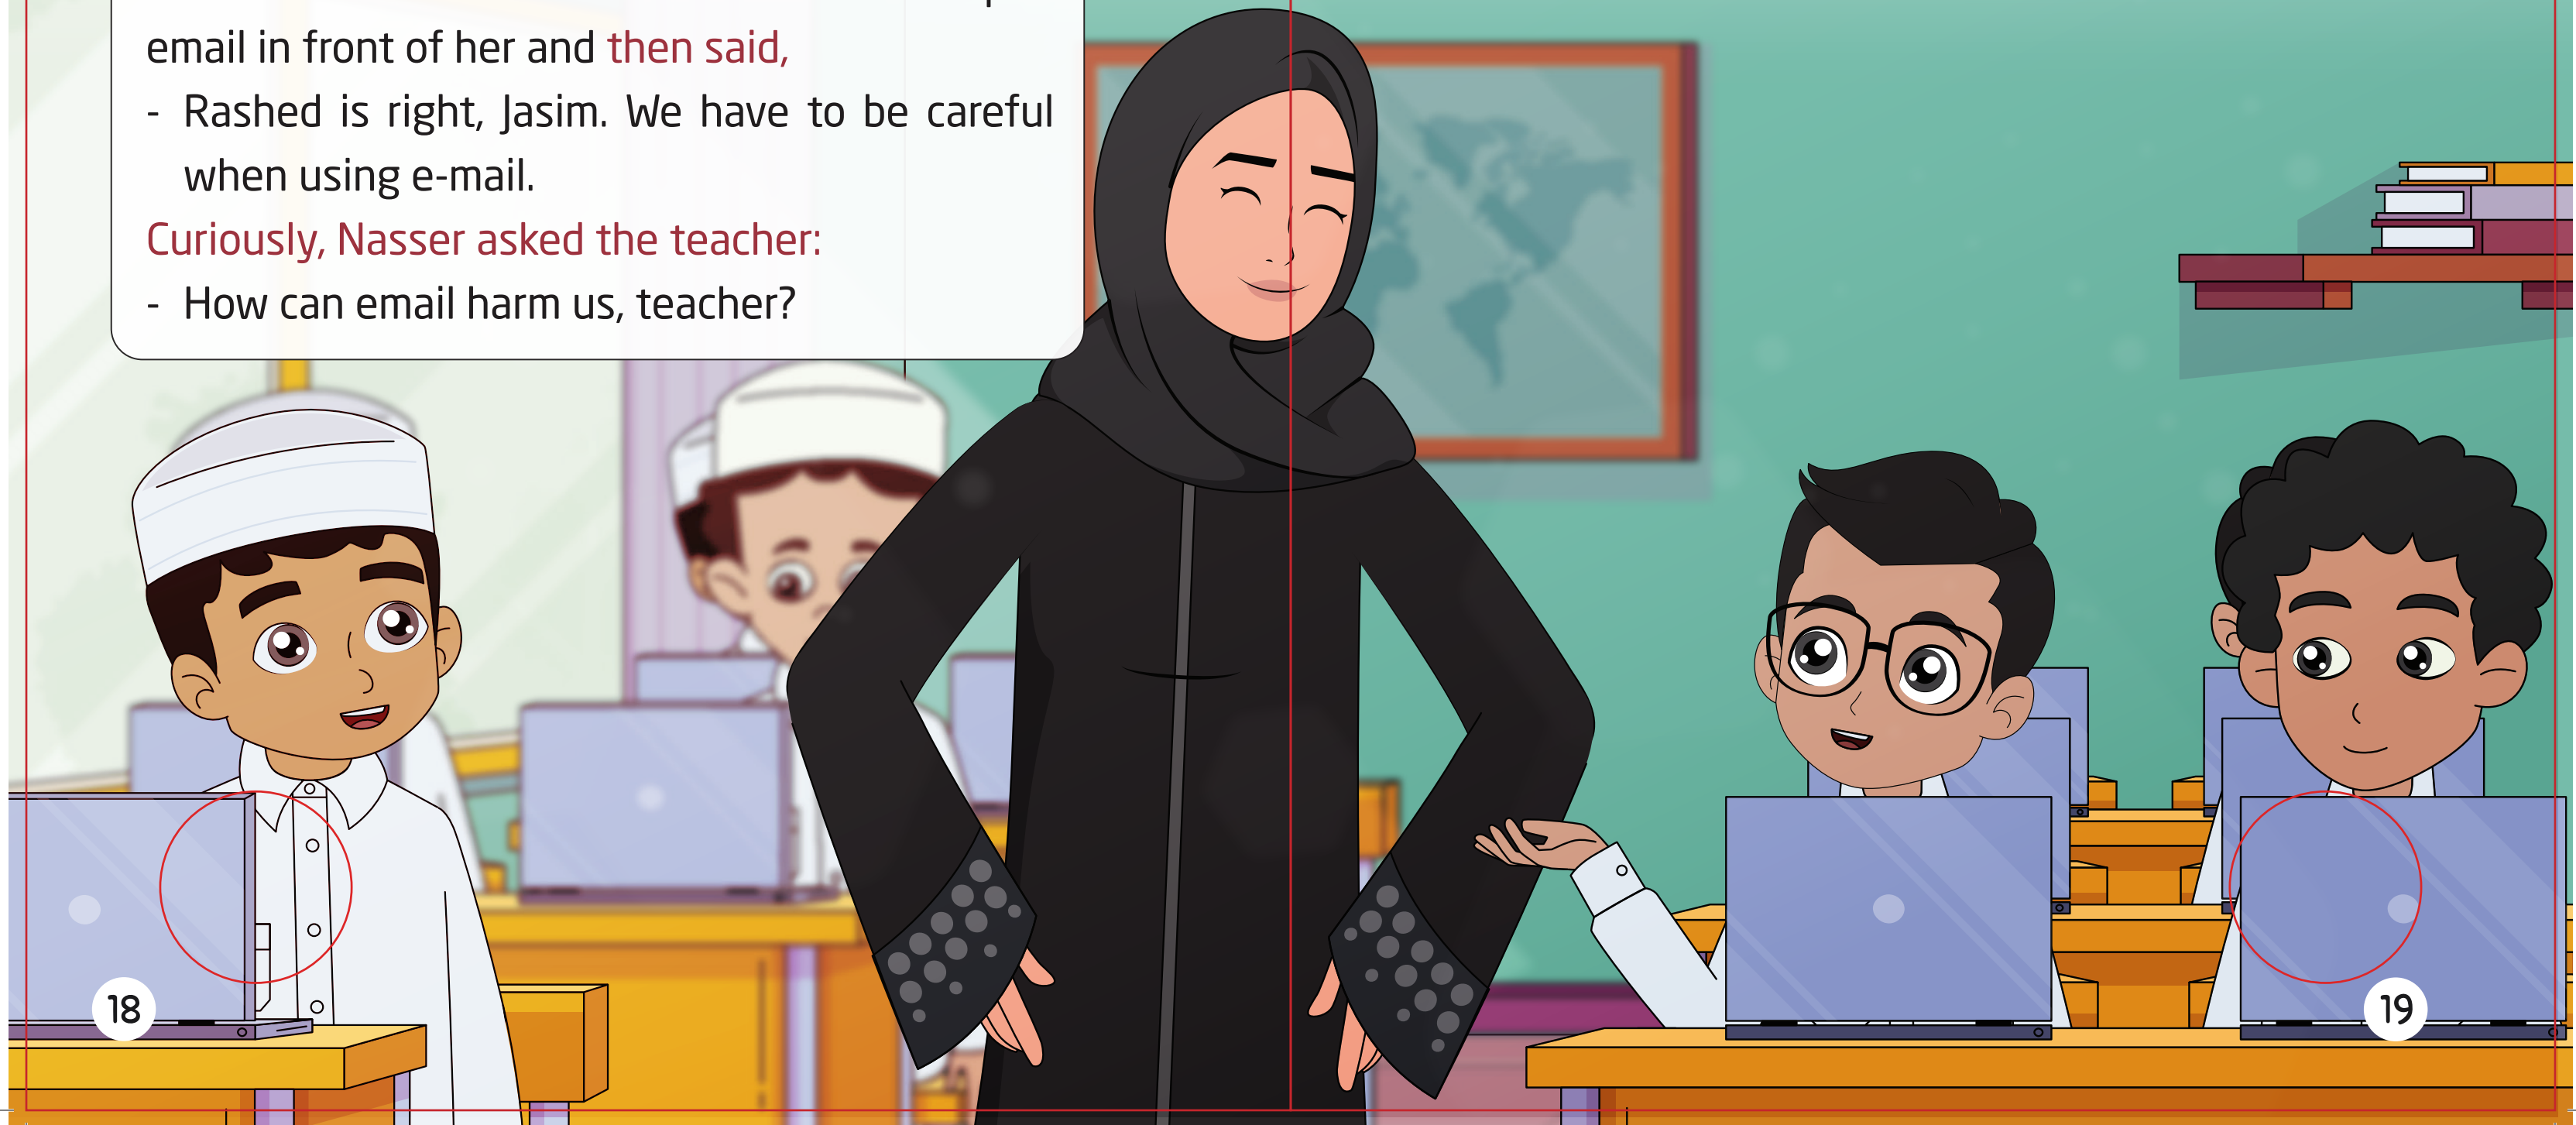

- But it's a known source. It's a toy store.

The teacher smiled as she examined the open email in front of her and **then said**,

- Rashed is right, Jasim. We have to be careful when using e-mail.

Curiously, Nasser asked the teacher:

- How can email harm us, teacher?

The teacher said:

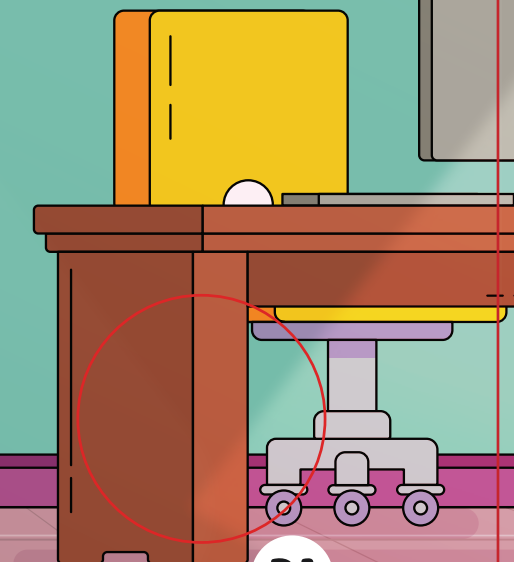

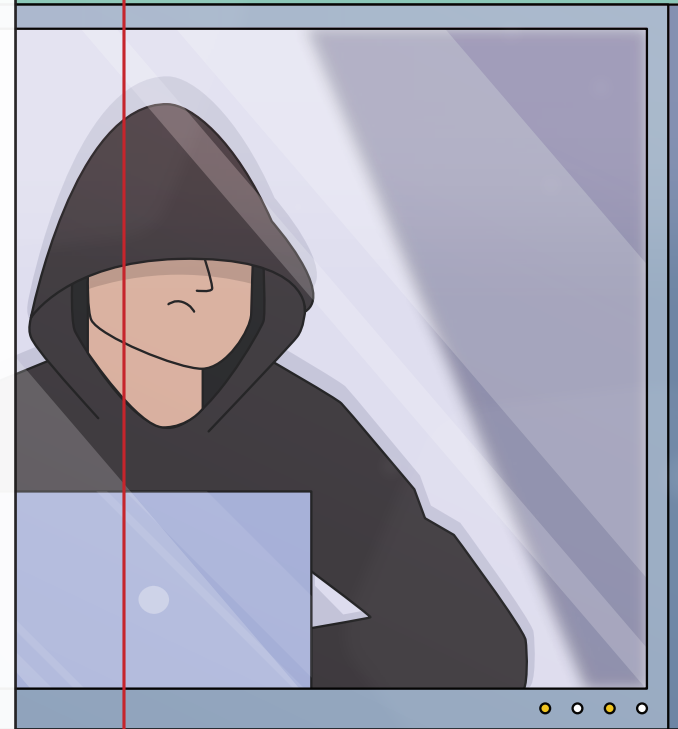

- The email itself can't harm us, but those who infiltrate through it can.
- And who are these infiltrators?
- We call them pirates.

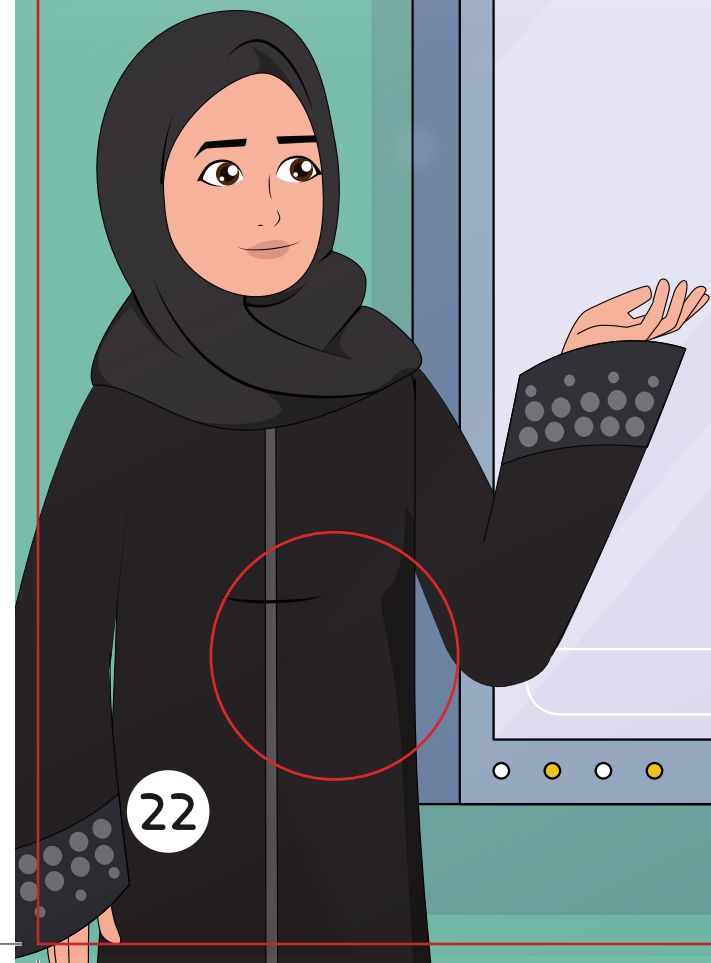

Nasser laughed and said:

- Like the pirates of the Caribbean? Ha ha ha

The teacher laughed and clarified:

No, Nasser. Those are sea pirates, but these are electronic pirates, who steal our personal information, and they may send us a malicious program or a spyware program to steal our data, preventing us from accessing our personal accounts.

22

Rashid asked:

- How do we protect ourselves from pirates?

The teacher replied:

- We need to create a strong, hard-to-guess password. We should protect our email passwords as if they were precious treasures. Also, enabling two-factor authentication, if possible.

23

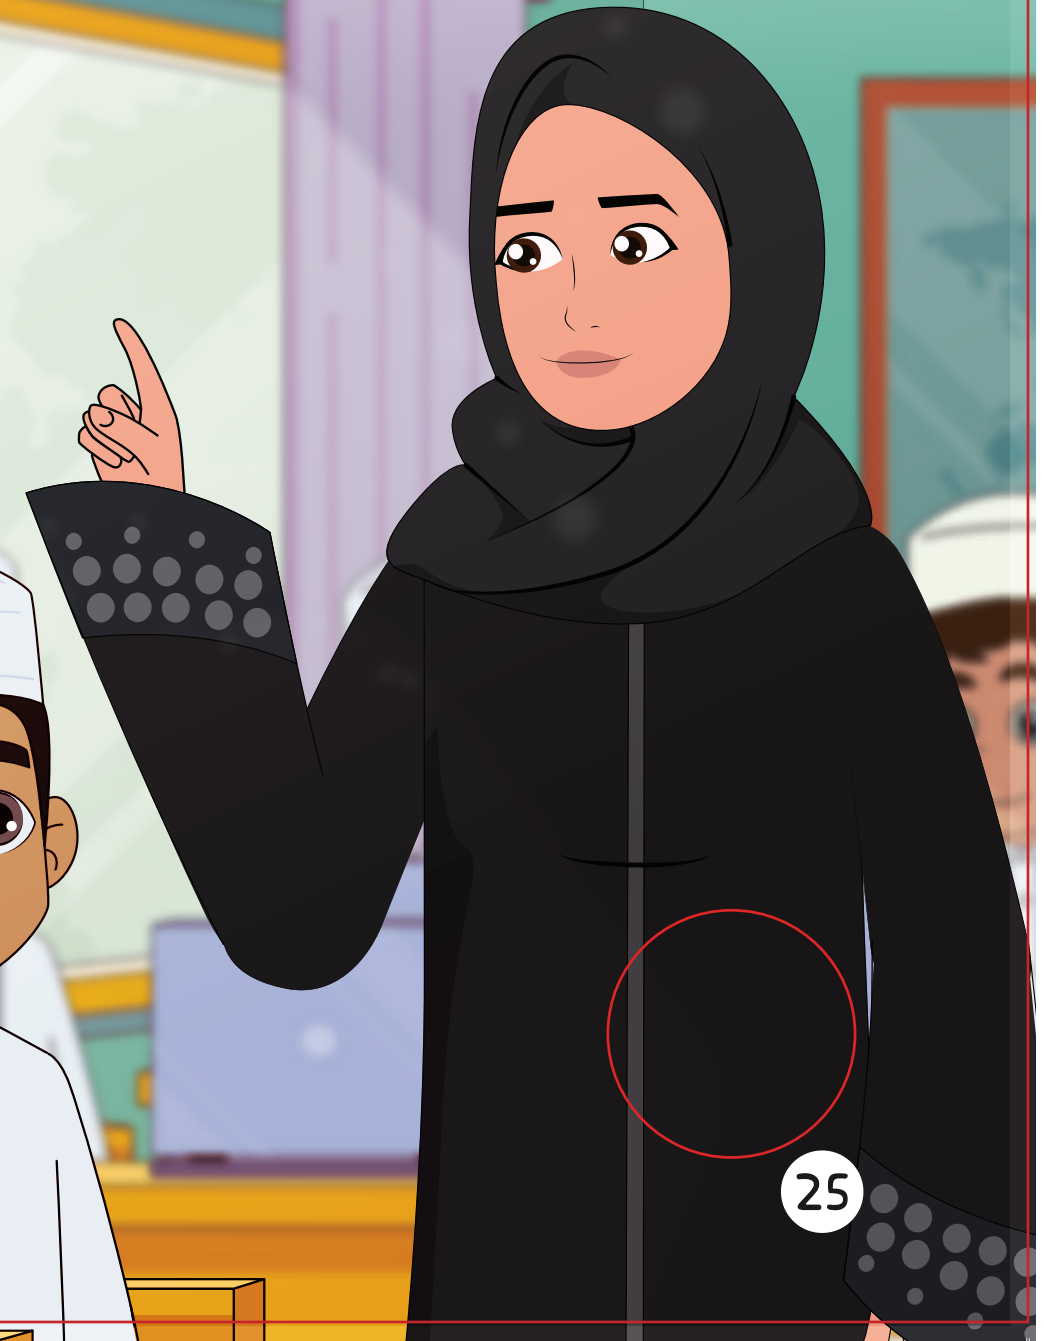

Jasim asked:

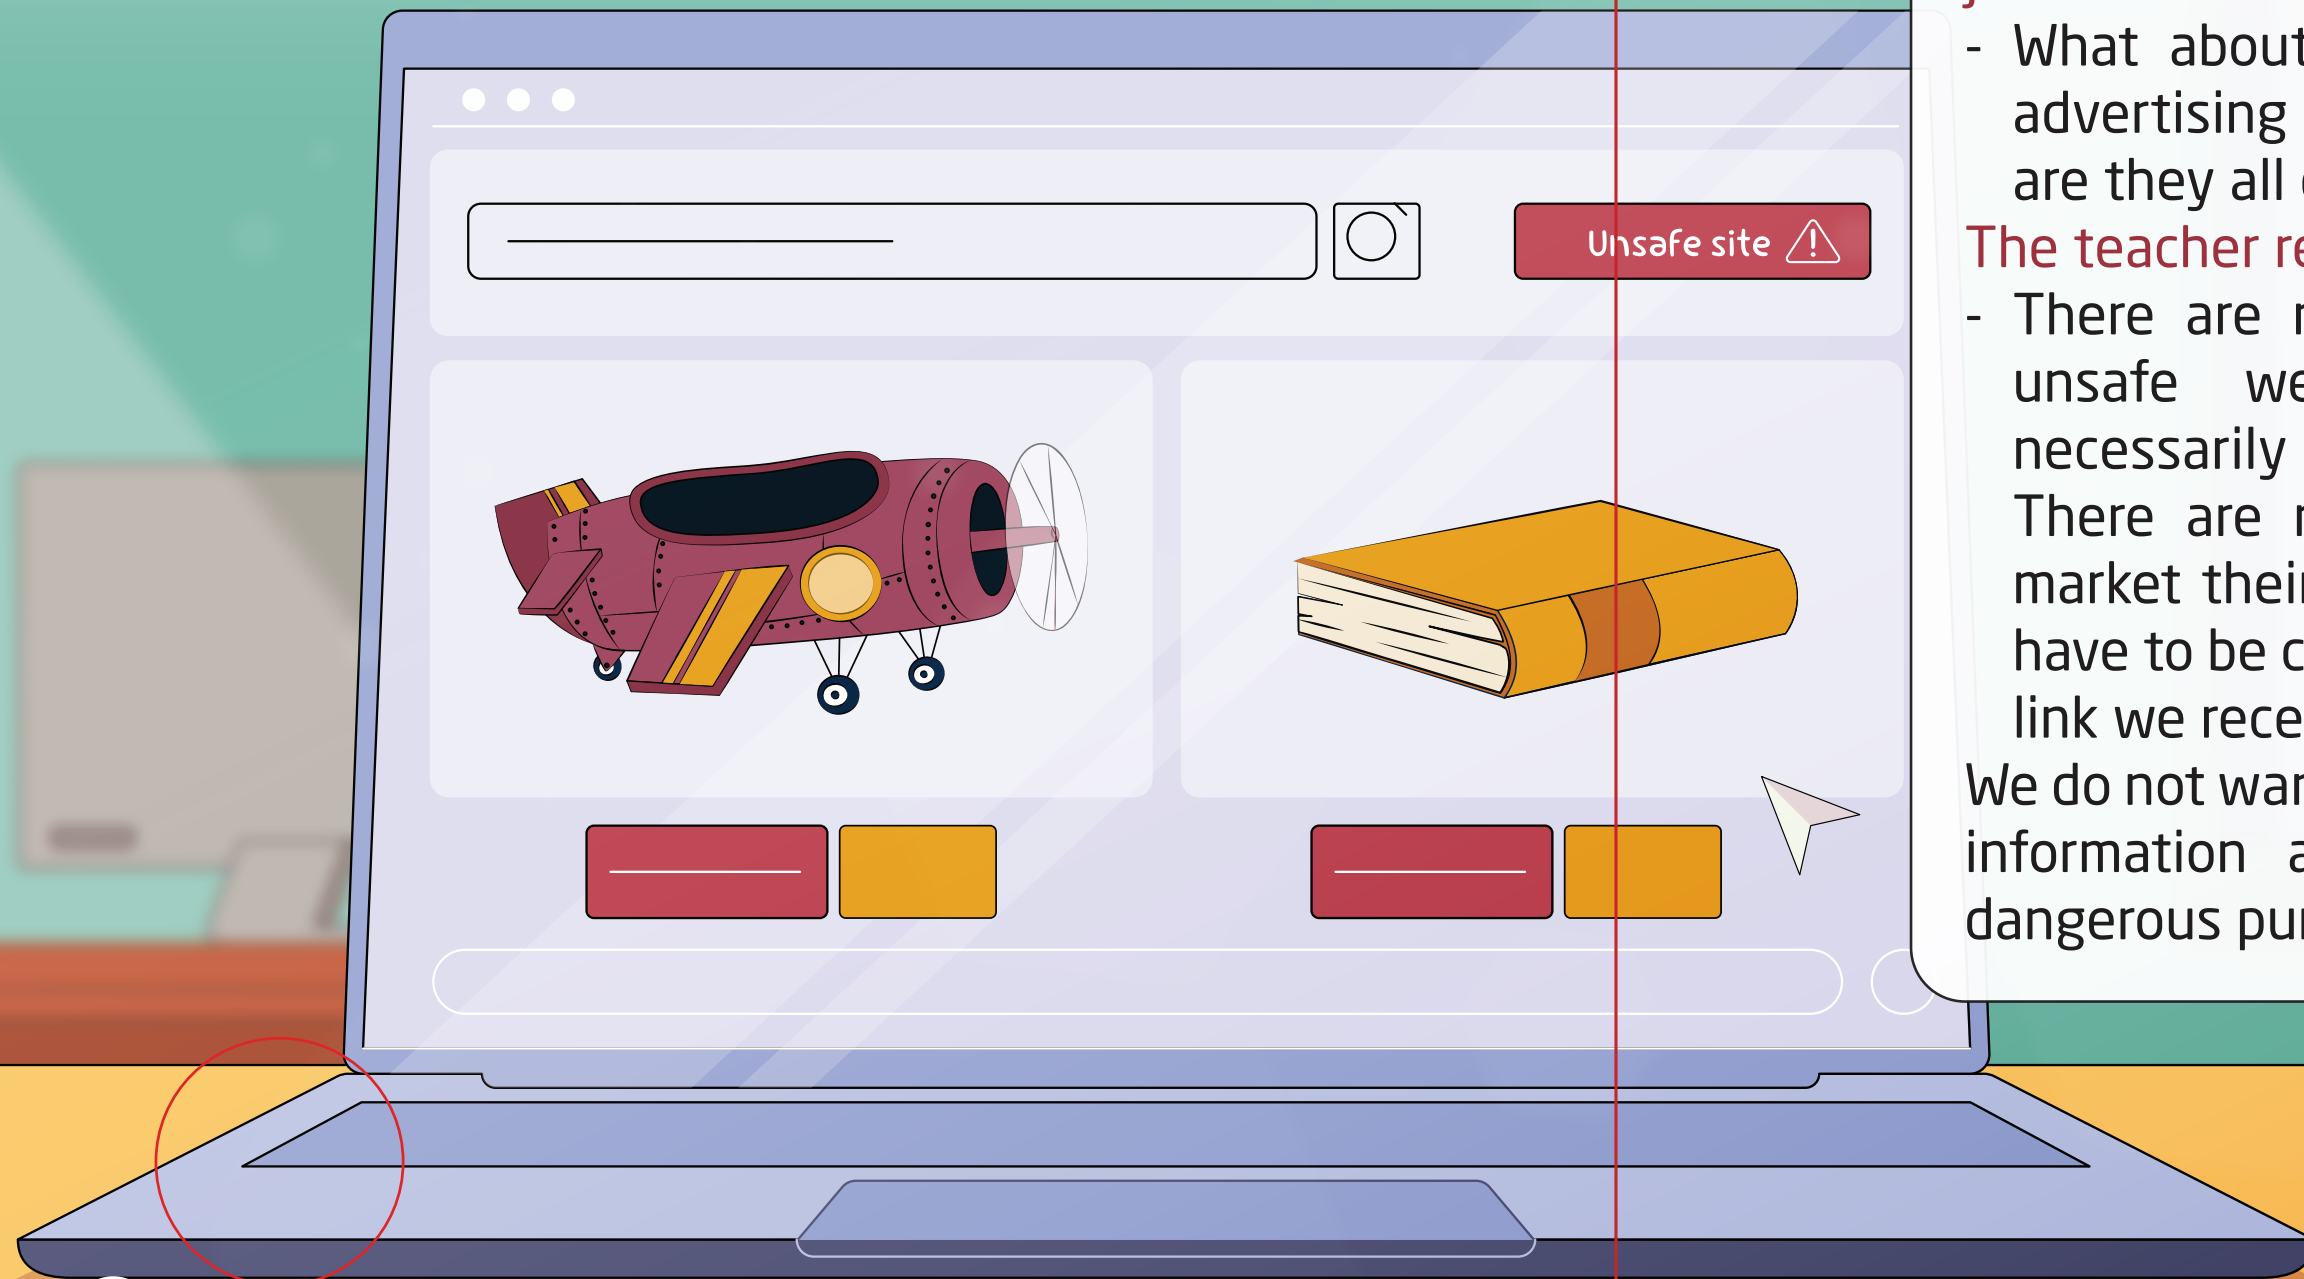

- How do we do that?

The teacher said:

- We must create a long password consisting of letters, numbers, and symbols to make it difficult for others to guess. We should avoid using our names or common words as passwords, and we must also refrain from opening messages that contain advertising links.

And remember, children, email is very important and very personal, so we must protect it and not share its information with anyone else, in order to prevent our computers from being hacked and our personal information from being stolen.

Jasim asked her:

- What about the websites that send us advertising links, such as this online store, are they all dangerous?

The teacher replied:

- There are many fake online stores and unsafe websites, and not all are necessarily dangerous and target data. There are real stores whose goal is to market their products, but to be safe; we have to be careful in our dealings with any link we receive via e-mail.

We do not want anyone to steal our personal information and use it for unknown or dangerous purposes.

Jasim, with a saddened expression,
said to the teacher,

- But I really want to buy that
airplane now. What should I do?

Nasser told him:

- This is easy. We'll go together after
school to the toy store across the
street. I think they have a similar
model to this airplane, and I also
want to buy a police car.

Jasim cheered happily and said:
Ok, my friend, I agree.
Nasser looked at Rashid and
asked him:
What about you, Rashid? Aren't
you going to buy anything?
Yes. I'll buy a ball, my ball was
punctured yesterday.
The teacher smiled and said:
Well done, my children enjoy your
time.
